

CAREER PROFILE

Web, Media, Technology Marketing Specialist

Director of Integration Services and Technology with unique experience successfully identifying, selecting, implementing and managing comprehensive data and project management infrastructure, marketing platforms, social media aggregation, web-CMS, and media production systems. Skilled at directing and motivating teams (local and overseas), project management, and high-level support. A skilled senior leader at vetting and commanding teams from project implementation, through back-end data tracking, to final reporting. An expert localization manager specializing in corporate business service marketing and technical localization for domestic and international markets. An experienced designer and webmaster with hands-on art direction and graphic design abilities. Highly skilled at all aspects of technology and able to leverage technological expertise in marketing and design efforts.

Selected value-offered highlights:

Oversight of multiple production teams spread across the United States, Europe, Russia, and China. Implementation of communication and production infrastructure so that remote design, marketing, and management teams can work efficiently and connect with the home office easily. Travel oversees to recruit and audit cost-effective and talented production companies. Maintain outstanding relationships with local (Rochester-area) media production companies and contractors.

Designer, copywriter, and multi-directional marketing strategy for multiple corporate websites. A decade of search engine marketing experience, media buying, CMS implementation and management, direct mail, e-mail, social.

Driving force for implementation of communications and knowledge-management platforms, integrating marketing and sales strategy into employee-client correspondence. Allow every employee to contribute to the marketing effort of the company with approved and standardized communications. A knowledge-management system ensures that staff rollover and transitions leave little downtime.

Proponent of customer data statistical analysis, geographic-information, demographics, and behavioral mapping as the driving force for marketing strategy, lead generation, and customer satisfaction.
